DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to concrete washout system, classified in class 134, subclass 178.
 - II. Claims 15-20, drawn to concrete cleaning assembly, classified in class 134, subclass 172.
 - III. Claims 10-14, drawn to a method for cleaning concrete from inside surface of a drum, classified in class 134, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require extending the second end of the telescopic pipe assembly **upon** activation of the fluid source. The subcombination has separate utility such as garden watering system.
3. Inventions of Group III and Group I or II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as

Art Unit: 1746

claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be utilized as the garden watering system for watering lawns and the process as claimed can be practiced manually (by hand).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and/or Group III, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. E. Tracy, esq., on 08/11/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Kornakov whose telephone number is (703) 305-0400. The examiner can normally be reached on 9:00am - 5:30pm.
